# Volume 157 1986

## Contents

**Letters to the Editor**

1.3 mm continuum observations of compact H II regions detected by IRAS. II
*Chini, R., Kreysa, E., Mezger, P.G., Gemünd, H.-P.* L1

New evidence for a ring around Neptune
*Manfroid, J., Haefner, R., Bouchet, P.* L3

Are microwave background small-scale fluctuations substantially overestimated?
*Bonometto, S.A., Shouping, X.* L7

The interpretation of blackbody spectra and radii during X-ray bursts
*van Paradijs, J., Lewin, W.H.G.* L10

Primordial fluctuations in a universe dominated by quark nuggets
*Schaeffer, R.* L13

A new free radical in I R C + 10216
*Guélin, M., Cernicharo, J., Kahane, C., Gomez-Gonzales, J.* L17

**Extragalactic astronomy**

H II region spectroscopy and two dimensional stellar photometry of the barred Seyfert NGC 1566
*Beckman, J.E., Bransgrove, S.G., Phillips, J.P.* 49

Groups of galaxies and the local supercluster
*Giuricin, G., Mardirossian, F., Mezzetti, M., Pisani, A., Ramella, M.* 129

Complex structure in A 496?
*Mazure, A., Gerbal, D., Proust, D., Capelato, H.V.* 159

**(RN)** Gravitational lenses: model fitting, time delay and Hubble parameter
*Kayser, R.* 204

Interpretation of the UV luminosity of elliptical galaxies
*Mochkovitch, R.* 311

The eruptive BL Lac object 0846+51W1: A gravitationally lensed QSO?
*Nottale, L.* 383

**(RN)** The blue Tully-Fisher relation in a variety of environments
*Giuricin, G., Mardirossian, F., Mezzetti, M.* 400

**Galactic structure and dynamics**

Stellar populations in the Milky Way: a synthetic model
*Robin, A., Crézé, M.* 71

Construction of a global gas-dynamical model for our Galaxy
*Mulder, W.A., Liem, B.T.* 148

Secondary production of neutral pi-mesons and the diffuse galactic gamma radiation
*Dermer, C.D.* 223

Surface photometry of edge-on spiral galaxies. V. The distribution of luminosity in the disk of the Galaxy derived from the Pioneer 10 background experiment
*van der Kruit, P.C.* 230

Dynamics of the ionized gas within 2 pc of the galactic center. I. First results of a radio recombination line survey
*Mezger, P.G., Wink, J.E.* 252

Theoretical considerations on the rotation curves of galactic halos
*Malagoli, A., Ruffini, R.* 293

Temperature distribution of interstellar dust
*Pajot, F., Boissé, P., Gispert, R., Lamarre, J.M., Puget, J.L., Serra, G.* 393

**Stellar clusters and associations**

Specific entropy and the evolution of unconfined stellar systems
*Kandrup, H.E.* 387

**Formation, structure and evolution of stars**

Spot cycles in the RS CVn variable AY Cet
*Poretti, E., Mantegazza, L., Hall, D.S., Sarma, M.B.K., Ausekar, B.D., Prakasa Rao, B.V.N.S., Boyd, L.J., Henry, G.W., Landis, H.J., Fried, R.E., Hopkins, J.L., Nielsen, P., Louth, H., Renner, T.R., Brooks, P.A., Miles, R., Stelzer, H.J., Pazzi, L.* 1

Optical and X-ray observations of 4U2129+47/V1727 Cyg in an extended quiescent state
*Pietsch, W., Steinle, H., Gottwald, M., Graser, U.* 23

The lower mass limit of the compact object in LMC X-3
*Mazeh, T., van Paradijs, J., van den Heuvel, E.P.J., Savonije, G.J.* 113

A non-local theory of time-dependent convection for numerical application to the radial pulsation of stars
*Gonczi, G.* 133

An investigation of the micro-variations of highly luminous OBA type stars. V
*van Genderen, A.M.* 163

Rotational braking of late-type main sequence stars
*Bohigas, J., Carrasco, L., Torres, C.A.O., Quast, G.R.* 278

A self-consistent treatment of the mechanical structure of contact binaries
*Kähler, H.* 329

Generalized mass-radius relations and mass-entropy relations for components of contact binaries
*Matraka, B.* 341

**Stellar atmospheres**

Molecular ions in the circumstellar envelope of IRC+10216
*Glassgold, A.E., Lucas, R., Omont, A.* 35

EXOSAT detection of an X-ray flare from the solar type star $\pi^1$ UMa
*Landini, M., Monsignori Fossi, B.C., Pallavicini, R., Piro, L.* 217

The condensation of grains in the ejecta of supernovae
*Pearce, G.* 335

**Diffuse matter in space (including HII regions and planetary nebulae)**

The energy-diameter relation of supernova remnants in the Large Magellanic Cloud
*Preite-Martinez, A., Fusco-Femiano, R.* 6

Millimeter wave spectrum of tricarbon oxide sulfide, OCCCS
*Winnewisser, M., Holland, F.* 19

Infrared studies of southern AFGL sources. II. GL4176 and GL4182: two sources in star forming regions
*Persi, P., Ferrari-Toniolo, M., Spinoglio, L.* 29

Limits of interacting stellar winds model of planetary nebulae. A numerical study
*Bedogni, R., D'Ercole, A.* 101

Interstellar absorption lines between 2000 and 3000 Å in nearby stars observed with BUSS
*de Boer, K.S., Lenhart, H., van der Hucht, K.A., Kamperman, T.M., Kondo, Y., Bruhweiler, F.C.* 119

Fragmented molecular clouds: statistical analysis of the $^{13}CO$ ($J=1$–$0$) emission distribution
*Pérault, M., Falgarone, E., Puget, J.L.* 139

Distances to planetary nebulae. I. The reddening-distance method
*Gathier, R., Pottasch, S.R., Pel, J.W.* 171

Distances to planetary nebulae. II. HI absorption observations
*Gathier, R., Pottasch, S.R., Goss, W.M.* 191

Ammonia observations and temperatures in the S140/L1204 molecular cloud
*Ungerechts, H., Walmsley, C.M., Winnewisser, G.* 207

Spectroscopy of supernova-remnants in the 0.6–1.05 μ spectral range
*Dennefeld, M.* 267

The centimeter transitions of *E*-type methanol
*Menten, K.M., Walmsley, C.M., Henkel, C., Wilson, T.L.* 318

**The Sun**

A synchrotron/inverse Compton interpretation of a solar burst producing fast pulses at $\lambda < 3$ mm and hard X-rays
*Kaufmann, P., Correia, E., Costa, J.E.R., Zodi Vaz, A.M.* 11

Plasma densities from the He-like ion NeIX
*Doyle, J.G., Keenan, F.P.* 116

Convective overshoot at the base of the Sun's convection zone
*Pidatella, R.M., Stix, M.* 338

Interplanetary plasma turbulence and the Doppler detection of a gravitational wave background
*Dobrowolny, M., Iess, L.* 346

Far-IR solar emission lines from high $n$ states of hydrogen
*Boreiko, R.T., Clark, T.A.* 353

**The solar system**

The uncertainty of position predictions for comet Halley in March 1986
*Landgraf, W.* 245

Conditions for the elements of the scattering matrix
*Hovenier, J.W., van de Hulst, H.C., van der Mee, C.V.M.* 301

**Celestial mechanics and astrometry**

Secular terms of classical planetary theories using the results of general theory
*Laskar, J.* 59

The dominant relativistic terms in the lunar theory
*Soffel, M., Ruder, H., Schneider, M.* 357

**Physical and chemical processes**

Angular momentum distributions and energies of rotating selfgravitating discs
*Schmitz, F.* 365

Erratum: The screening of photodisintegration reactions
*Mochkovitch, R., Nomoto, K.* 403

**Instruments, data processing, and computational methods**

Biases of digital VLBI observables due to small signal approximation and imperfect fringe rotation
*Borkowski, K.M.* 91

Evaluation of the performance of the 576384 Thomson CCD for astronomical use
*Mellier, Y., Cailloux, M., Dupin, J.P., Fort, B., Lours, C., Picat, J.P., Tilloles, P.* 96

Visibility and phase analysis for image and pupil plane interferometry at optical wavelengths
*Chelli, A., Mariotti, J.M.* 372

**Abstracts of articles which have been published in A. & A. Suppl. Ser. 63, No. 3**

Photometric variability of some early-type stars
*Mathys, G., Manfroid, J., Renson, P.* 404

An atlas of high resolution IUE ultraviolet spectra of 14 Wolf-Rayet stars
*Willis, A.J., van der Hucht, K.A., Conti, P.S., Garmany, D.* 404
